

Macau, the city with two faces. On the one hand, the influence of its former colonial master Portugal in buildings and food show a rather unknown Mediterranean style on the Chinese coast...still the reason why Macau is widely remembered as charismatic but sleepy. On the other hand, Macau nowadays is the self-styled Vegas of the East with mega-casinos and hotels and has experienced a boom that usually is associated with cities like Shanghai.

There is no doubt about **Hong Kong's** strategic location as world city and global marketplace at the heart of the world's fastest growing economies like Mainland China and Korea. It links the booming Asian economies with major markets worldwide due to its easy access, sophisticated infrastructure, professionalism and vibrant lifestyle. Hong Kong converges to become what is recognized as Asia's premier destination for the global MICE-industry.
